Keep holiday meals joyful — avoid fires and injuries.

Deep-frying a turkey can be delicious, but it's also one of the riskiest ways to cook. Before you plug in or fire up a fryer, follow these safety tips:

Set up safely

- Use outdoor fryers at least 10 feet away from buildings, garages and overhangs.
- Place the fryer on a flat, sturdy surface and don't move it once it's heating.
- Never leave a fryer unattended.
- Keep children and pets at least 3 feet away.

Prevent burns and fires

- Wear oven mitts and use long utensils to avoid contact with hot surfaces and oil.
- Test the oil level before cooking. Fill the fryer with water and lower the turkey in to see how much liquid is needed. Dry everything completely before adding oil.
- Use a fully thawed and dry turkey—never fry a frozen one.

Monitor temperatures

- Use a thermometer to make sure oil is at the recommended temperature.
- Avoid overloading outlets if using an electric fryer; unplug other appliances before use.

TURKEY FRYER SAFETY

Don't let a fire ruin the feast.

Notes from Load Management

The Load Management program for PREMA had a successful 2025 season. Total savings for the year was \$506,261. We controlled a total of 30 days for the season, starting May 12th and ending September 12th.

If you are a PREMA irrigator and are interested in participating in Load Management for 2026, please call the office at 308-762-1311 and speak with Nick Paradeis.
